Period : 12 hrs Team Size: 1

Data Analytics using Python

In this project, I've harnessed the power of essential libraries such as pandas, Matplotlib, and Seaborn. Leveraging these tools, I've transformed raw data into a clear, organized format, facilitating seamless analysis. Through rigorous data cleaning processes, I've unearthed invaluable insights crucial for business expansion and development.

Conclusion

Married Women Age group of 26-35 yrs from UP, Maharashtra, and Karnataka working in IT , Healthcare and Aviation Sector are more likely to buy Food, Clothing & Apparel and Electronics & Gadgets item
